2026

Tribunal nombrado por el Magfco. y Excmo. Sr. Rector de la Universidad Politécnica de Madrid, el día \_\_\_\_ de \_\_\_\_\_ de 202X.

Presidente: PhD jury committee 1.

Secretario: PhD jury committee 2.

Vocal: PhD jury committee 3.

Vocal: PhD jury committee 4.

Vocal: PhD jury committee 5.

Suplente: PhD jury committee 6.

Suplente: PhD jury committee 7.

Opta a la mención de "Doctor Internacional"

Evaluable de organizaciones internacionales:

Reviewer 1, Institution, Country.

Reviewer 2, Institution, Country.

Realizado el acto de defensa y lectura de la Tesis el día \_\_\_\_ de \_\_\_\_\_ de 202X en la E. T. S. Ingenieros Industriales.

CALIFICACIÓN:

EL PRESIDENTE

# Abbreviations

**EOA**            Example of Abbreviation.

# Part I

---

## INTRODUCTION

## State of the art

Background of your work.

This is an example of a reference (Croff 1983).

## Objectives of this Thesis

Main goals and contributions arising from this Thesis.

## Layout of this Thesis

This Thesis is divided into five Parts, with several related Chapters in each of them. Firstly, Part I establishes the framework and background of this Thesis and presents the original contributions and outcomes.

Part ?? corresponds to the description of the fundamentals that applies to this work...

# Part II

---

## FUNDAMENTALS

## Atmosphere structure and properties

## Radiation-atmosphere interaction

- 6.1 Elastic scattering
- 6.2 Extinction
- 6.3 Raman scattering
- 6.4 Absorption
- 6.5 Radiative transfer equation

## Atmospheric aerosol characterization

## Atmospheric aerosol properties

### 8.1 Optical properties

### 8.2 Microphysical properties

## Lidar technique

- 9.1 Principle and equation
- 9.2 Aerosol intensive properties
- 9.3 Depolarization lidar
- 9.4 Fluorescence lidar

# Part III

---

DEVELOPMENTS AND APPLICATIONS I

# Part IV

---

## CONCLUSIONS AND FUTURE WORK

# Conclusions

10

Conclusions and main outcomes of work carried out in this Thesis.

## Future work

As a continuation of the work carried out in this Thesis, the following lines are identified for further research.

# Bibliography

Croff, A. G. (1983). "ORIGEN2: A Versatile Computer Code for Calculating the Nuclide Compositions and Characteristics of Nuclear Materials". In: *Nuclear Technology* 62.3, pp. 335–352. DOI: 10.13182/NT83-1 (cit. on p. 3).

# APPENDIX

A

## A.1 APPENDIX I
